Nail Hock

The complete puzzle.

Step 1
Keep the right part (B) hushed up and turn the left part (A) anti-clockwise while moving carefully in the direction of part B at the same time. Turn the puzzle 180 degrees!

Step 2
Slide both parts A and B together...

Step 3
Move part A through part B....

Step 3a
....and keep on moving like this!

Step 4
From this situation move part B along part A as shown.

Step 5
Move part B in the direction of corner of A. Just before the corner move part B upwards.

Step 6
Keep part B vertically and move it a little around the corner of part A.

Step 7
While moving around the corner find the place where the point of part A goes into part B.

Step 8
Find by maneuvering of part A the correct place where the heads can pass each other and let the nail heads pass.

Step 8a
Here the head of part A has just passed the head of part B.

Both parts are separated!
